Thanks Greg this is good news. Do you have a list of the 21 counties you could share?

Thanks in advance,

James

Subject: private water well sampling

James,

Here is the latest info on the residential well sampling:

EPA continues to make contact with the remaining 18 counties regarding private water well testing and our research indicates that private well testing is available across the state for a nominal fee. EPA has confirmed 21 of the 39 disaster declaration counties are currently providing private well testing for area residents. Texas Department of State Health Services also offer bacteria testing for \$28 through the state lab. The TCEQ website provides public information and a list of NELAP Accredited Labs for well owners to analyze water samples for a fee.
